## C&T TransCube Rentals & Bulk Fuel Sales Policy

C&T Rentals has one of the largest rental fleets of Trans Cubes in the province.

Our customers expect Trans Cubes with uncontaminated diesel or gasoline in them if they request fuel to avoid expensive repairs and down time on equipment such as generators.

Alternatively, if our customers choose to purchase their fuel elsewhere, we are happy to provide empty Trans Cubes.

When C&T is requested to provide Trans Cubes with fuel in them to our customers, we will invoice the rental, fuel, and delivery charges on the date of delivery.

To service, maintain and inspect our tanks to keep them free from contamination, our tanks should be returned to C&T **empty of fuel**. Credits will not be issued for fuel returned in tanks. Pump out and disposal charges may apply to tanks that are returned containing contaminated fuel.
